SKILLS

DevOps engineer with more than a decade worth of working experience in the tech sphere. I am proficient with Linux, Mac and Win OS as well as the agile methodology, IaC and cloud based computing.

NOTEWORTHY

Hashitalks 2021 - *Invited speaker - Modernizing development and release workflow*
Hashiconf 2019 - *Attendee at the hashiconf conference furthering my understanding of the tooling and direction*

EXPERIENCE

Bloom And Wild Ltd, Senior Platform Engineer, Remote
- Platform engineer for one of Europe's biggest flower delivery company
Nov 2021 - Aug 2022

- Eliminate friction from development to delivery.
- Maintain platform and services uptime including support for developers and relevant stakeholders.
- Spearhead development of self serving microservices offering.
- Shift to self hosted Github runners.

Freelance DevOps engineer and consultant - geneplanet, Ljubljana - *DevOps engineer and consultant*
May 2020 - Nov 2021

- Using expertise gained to provide developers with a platform where they can develop and deploy with confidence
- Automating as much as possible and doing IaC as well as On-Prem infra

- To achieve the goal used terraform, nomad, vault,consul, consul templates, vagrant and packer, docker-compose and git
- Currently working on a .net microservice framework on top of MS Azure utilizing containers, Service Plans, Function apps, App Insights to name a few. My work is setup and provisioned with IaC and terraform and thus cloud agnostic

d.labs, Ljubljana - *DevOps engineer*
November 2018 - May 2020

- Working with Iac to provide developers with working infrastructure. AWS based.
- To achieve the goal used terraform, nomad, vault,consul, consul templates, vagrant and packer.

Multimedia Vision, Ljubljana - *System administrator & operator*
November 2017 - November 2018

- Working with VMware to ensure virtual machines for the dev environment work on the next generation of smart set-top boxes.
- Maintaining and implementing periodic backups and disaster recovery plans. Improving software delivery with pipelines and incorporating them to the workflow.

Jozef Stefan Institute, Ljubljana - *System administrator*
September 2015 - Februar 2017

- Responsible for maintaining Windows and Linux servers and computers with virtualization - hyper V, firewall, AD user auth, updating programs, managing backups and validation.
- Day to day operation including support and new machine setup
